*Pollinators, including bees, butterflies, birds, and bats, are an important part of our ecosystem and food supply chain. Plants, like fruits and vegetables, need bees and other pollinators to help them grow.*

Find out how EPA is protecting pollinators: <https://www.epa.gov/pollinator-protection>

**Subject:** FW:NEEDED BY FRIDAY: topics for SMT

Hi there-

Kathleen would like two slides for Rosemont. One with a photo and one with a few bullets that highlight the status of

#### **Deliberative Process / Ex. 5**

bullets. Do we have a good photo we can use? Below are my thoughts on bullets points. I can ask Gene to help with the PPT – I just need a good photo and maybe a map – I think I’ve seen a PPT with both of these. We need this by Friday AM.

Thanks  
Nicole

- Proposed copper open pit mine south of Tucson, AZ on 4700 acres(3670 acres of Coconino National Forest. Will account for 10% US copper production.
- Federal Action: USFS NEPA lead for EIS, Army Corp of Engineers evaluating 404 permit
- Impacts: degradation of aquatic habitats across protected preserves; significant air impacts; T&E species; tribal/cultural impacts
  - Cienega Creek Watershed
  - Direct impacts to 18 linear miles of headwater streams, seeps springs
  - Water quality concerns
  - Surface water impacts of gw drawdown(64,000 acre impact zone)
  - 404 compensatory mitigation not commensurate with scale
- December 2013 through Spring 2016, CEQ convened regular interagency coordination calls, in which EPA participated in order to avoid referral under NEPA.
- July 2016, COE LA District Office recommended denial of 404 permit;
- January 2017, we learned that COE South Pacific Division had, in December 2016, corresponded with proponent re: proponent's interest in obtaining an approved JD, and COE plans to schedule a meeting with proponent in Jan/Feb 2017 to discuss COE's review of the permit application.
